

**3. Extensive indoor broilers - high welfare - (30kg/m<sup>2</sup>)**

All valuations are expressed in pence per bird

Age (days)	1	2	3	4	5	6	7
As-hatched	55.54	57.56	59.74	62.10	64.58	67.24	70.06

Age	8	9	10	11	12	13	14
As-hatched	73.06	76.27	79.65	83.06	86.67	90.49	94.50

Age	15	16	17	18	19	20	21
As-hatched	98.71	103.12	107.78	112.63	117.72	123.06	128.59

Age	22	23	24	25	26	27	28
As-hatched	134.01	139.53	145.24	151.18	157.35	163.71	170.31

Age	29	30	31	32	33	34	35
As-hatched	177.10	184.13	191.35	198.76	206.59	214.39	222.34

Age	36	37	38	39	40	41	42
As-hatched	230.49	238.79	247.25	255.86	264.62	273.50	282.50

Age	43	44	45	46	47	48	49
As-hatched	291.65	300.88	310.23	319.55	328.95	338.42	347.97

This table is intended to provide valuations for broiler strains of table birds grown under contract to one of the major processors. It is NOT intended to be used for growers producing birds for direct sales from their own processing facilities.

The use of fast-growing broiler strains is assumed. Conventional broiler strains of table birds are white-feathered, although (very occasionally) some may have a proportion of brown feathers.

The table relates to broilers reared at a stocking density of up to 30kg/m<sup>2</sup> ('extensive indoor'). The birds are provided with a variety of enrichment devices e.g. straw bales, hanging objects to peck at etc. The majority of birds in this system are reared under the RSPCA scheme and to their standards. They are generally reared 'as-hatched' - i.e. males and females together in broadly equal numbers.

If the age of birds exceeds that given in the table, a pro-rata figure should be calculated using the last two valuation points to determine the daily increment.
