

TEMPLATE 1

To date, financial support for farming has failed to provide a countryside that is rich in nature.

I would like the protection and restoration of the environment to be the central focus of a new agriculture policy post-Brexit in Northern Ireland. Our countryside is reliant on a healthy and vibrant rural economy with farming playing a central role; to achieve this, a new agriculture policy must have environmental protection and restoration at its core.

It's important to me that farmers and land managers are supported and rewarded for farming practices that work with nature. I would love to see a countryside that is filled with wildlife, producing sustainable and healthy food, and allows me to experience the natural world.

To achieve this, the new policy must:

- Include more financial support to help protect nature and wildlife
- Ensure that funding enables farmers and land managers to deliver a range of environmental benefits

Please ensure the policy recognises that the future of agriculture is dependent on a healthy natural environment. Only then can we create a sustainable food and farming system that works for people and nature.

The names of individuals who responded using Template 1
